Education

Master of Science: Business Analytics

Expected: Aug 2025 – July 2027

Fordham University – Gabelli School of Business

Bachelor of Science: Social Data Science (government concentration) & Psychology

Aug 2021 – Dec 2024

University of Maryland, College Park

- Member: Rewriting the Code, Alpha Sigma Kappa (women in technical studies sorority), Phi Kappa Phi Honor Society
- Leadership: Alpha Phi Omega (community service fraternity), College Park Scholars Program

Experience

Associate, Programmatic, WPP Media

March 2025 - Present

- Support the launch of programmatic campaigns for Johnson & Johnson, delivering on tight deadlines across multiple brands
- Handle campaign setup, pacing, and optimization in DSPs including The Trade Desk, DV360, DeepIntent, and PulsePoint
- Track and adjust monthly campaign budgets in Prisma to ensure accuracy and keep cross-functional teams aligned
- Apply audience segmentation and other targeting strategies to expand campaign reach and improve performance

Undergraduate Teaching Assistant, University of Maryland

Aug 2023 – Dec 2024

- **Data Science Techniques (INST414)**: Provided hands-on assistance to 26 students learning data science (clustering, classification, regression, statistics) during lab and office hours
- **Introduction for Programming for Information Science (INST126)**: Provided hands-on assistance to 145 students learning Python (variables, data types, arrays, conditionals, loops, functions) during class and office hours
- **Research Methods in Psychology (PSYC300)**: Provided hands-on assistance to 16 students learning research methods (Qualtrics, statistical analysis in R, qualitative and quantitative data collection and cleaning) during lab and office hours

Data & Analysis Intern, Digitas

June 2024 – Aug 2024

- Automated data cleaning process in Python to reduce reporting time by 20%
- Collaborated in team of 8 to design and present a data-driven marketing campaign for Sephora, which intended to increase customer engagement by 18% through audience segmentation
- Supported CRM initiatives by maintaining and updating benchmarks for quarterly reviews for Haleon
- Created detailed data reports using PowerBI and Excel to ensure accuracy and clarity for Haleon

Data Curation Fellow, University of Maryland

Jan 2023 – June 2023

- Located, cleaned, and analyzed 10 datasets using Python and R for use by university professors
- Worked in team of 3 to create coding questions for use in information science courses
- Maintained comprehensive documentation of sources and data handling processes

Psychology Research Assistant, University of Maryland

Feb 2022 – Dec 2022

- Conducted research on selective exposure and wrote and presented 12 literature reviews of studies
- Processed over 50 participants through decision, attention, and memory studies

Projects

Social Data Science Capstone Project, University of Maryland

Aug 2024 – Dec 2024

- Conducted sentiment analysis using natural language processing (Python) to evaluate customer feedback
- Developed detailed customer journey maps and personas to improve engagement strategies by 24%
- Created interactive visualizations in Tableau to showcase sentiment trends and correlations
- Cleaned and consolidated 12 datasets into two unified datasets to ensure data consistency

Artificial Intelligence Case Competition, University of Maryland

Oct 2024 – Oct 2024

- Collaborated in team of 4 to design an AI-powered talent identification and scoring tool for ASHA IT, a small DMV business
- Used NLP to analyze and score resumes, identifying key qualifications and matching candidates to roles
- Presented ideas to a panel of judges to communicate technical details and potential business impact

- Collaborated in team of 5 to develop a data-driven proposal for a city for a new NBA team, aiming to generate an estimated \$1.4M in annual revenue through ticket sales
- Created dashboards in Tableau using data visualizations and explained visuals during presentation
- Applied machine learning models to predict the NBA's yearly expenses for the new team until 2030

Skills

- | | |
|---|--|
| • Programming (Python, R) | • Excel (pivot tables, VLOOKUP, conditional formatting, data visualization, Power Query) |
| • Database Design (MySQL) | • Demand Side Platforms (TTD, DV360, PulsePoint, DeepIntent) |
| • Data Visualization (Tableau, Gephi, Power BI) | • Survey Design (Qualtrics) |
| • Inferential statistics (t-tests, chi-square tests, z-tests) | • Project Management (Jira, Miro) |
| • Regression analysis (linear, logistic, multiple regression) | |
