Portfolio: <https://josiewhittington.github.io/>

Skills

Database design (MySQL, Oracle Modeler & Apex); Programming (Python/R); Excel (pivot tables/VLOOKUP/Power Query); Visualization (Tableau/Power BI/Gephi); Statistics (t-tests/chi-square tests/z-tests/regression analysis); Survey Design (Qualtrics); Demand Side Platforms (The Trade Desk/DV360/PulsePoint/DeepIntent); Alteryx

Education

Master of Science: Business Analytics

Expected: Aug 2025 – Aug 2027

Fordham University – Gabelli School of Business

Bachelor of Science: Social Data Science (government concentration) & Psychology Aug 2021 – Dec 2024

University of Maryland, College Park

- Leadership: Alpha Phi Omega (community service fraternity), Rewriting the Code, College Park Scholars, Alpha Sigma Kappa (women in technical studies sorority), Phi Kappa Phi Honor Society
- Relevant Coursework: *Data Science Techniques, Statistical Methods, Database Design, Research Methods, Programming for Information Science*

Experience

Associate, Programmatic, WPP Media

March 2025 - Present

- Validated and audited large-scale datasets across multiple platforms to ensure data integrity and accuracy
- Monitored data pipelines for pacing and delivery, maintaining variance within 5% of planned thresholds
- Applied segmentation and performance analytics to assess trends and optimize outcomes
- Maintained detailed documentation to support consistent and reliable reporting

Undergraduate Teaching Assistant, University of Maryland

Aug 2023 – Dec 2024

- **Data Science Techniques:** Provided hands-on assistance to 26 students learning data science (clustering, classification, regression, statistics) during lab and office hours
- **Introduction for Programming for Information Science:** Provided hands-on assistance to 145 students learning Python (variables, data types, arrays, conditionals, loops, functions) during class and office hours
- **Research Methods in Psychology:** Provided hands-on assistance to 16 students learning research methods (Qualtrics, statistical analysis in R, qualitative and quantitative data collection and cleaning) during lab and office hours

Data & Analysis Intern, Digitas

June 2024 – Aug 2024

- Automated data cleaning process in Python to reduce reporting time by 1 day
- Collaborated in team of 8 to design and present a data-driven campaign for Sephora, prioritizing increasing reach among BIPOC Gen-Z
- Conveyed campaign insights through creation of data visualizations using PowerBI and Excel to display campaign trends over the quarter

Data Curation Fellow, University of Maryland

Jan 2023 – June 2023

- Located, cleaned, and analyzed 10 datasets using Python and R for academic use
- Developed practice coding exercises focused on data manipulation, analysis, and visualization
- Maintained spreadsheet with documentation of sources and data handling processes for each dataset

Psychology Research Assistant, University of Maryland

Feb 2022 – Dec 2022

- Conducted research on selective exposure and wrote 12 literature reviews of studies
- Processed over 50 participants through memory studies and cleaned participant data in Excel

Projects

Social Data Science Capstone Project, University of Maryland

Aug 2024 – Dec 2024

- Conducted sentiment analysis using NLP in Python to evaluate 2 years of customer feedback
- Created interactive visualizations in Tableau to showcase sentiment trends and correlations over time
- Cleaned and consolidated 12 datasets into two unified datasets to ensure data consistency

Artificial Intelligence Case Competition, University of Maryland

Oct 2024 – Oct 2024

- Collaborated in team of 4 to design an AI-powered talent identification tool for ASHA IT, a DMV business
- Applied NLP to analyze and score resumes based on candidate qualifications

Smith Analytics Consortium Datathon, Deloitte & Smith School of Business

Apr 2024 – May 2024

- Collaborated in team of 5 to propose a city for a new NBA team, predicting to generate \$1.4M in annual revenue through ticket sales
- Created 5 Tableau dashboards to visualize current and future NBA trends
- Applied multiple regression models to predict the NBA's revenue projections for the new team until 2043
